RT-7x series of high-speed motorized and hand-crank radial lead cutters offer easy, no tooling required set-up. These machines neither score or damage component leads nor lace mechanical stress or axial tension on the component. The machine cuts components from single bandoleers with a fully adjustable lead length, from 2 mm to 10mm, and the blade will accommodate lead from 0.3 mm to 1.2 mm.

- Independent rotary disc cutters extend longer cutting life.
- Won't score or damage leads or components.
- Heavy duty construction.
- Easy maintenance.
- Simple operation.
